ABOUT

Since 2020, I've developed frontend projects using React and Next.js. I've worked in [Uniqosoft](#) company which I was involved in developing new features and maintaining websites built for customers using MVC PHP frameworks. Currently, I'm focused on "[Bargiino](#)", a comprehensive worksheet platform for elementary school students (grades 1-6).

WORK EXPERIENCE

Frontend Engineer, Self employed, Qom, Iran, Feb 2023 - present

- Developed various projects using React and Next.js
- Currently working on the "Bargiino" full-stack project with Laravel backend and Next.js 14 (App Router) frontend.
- Created a test project based on divar.ir website for listing and managing ads. The project is deployed and accessible at: [link](#)

Fullstack Developer, Uniqosoft, Tehran, Iran, Mar 2020 - Jan 2023

Uniqosoft is an award-winning web design agency that worked with more than 20 brands in Iran.

- Was in charge of implementing new feature and landing pages for Ofogh Kourosh website,
- Developed and maintained internal portals for Ofogh Kourosh company (which is one of clients)
- Implemented the stores section of the Hayat Market site using the CakePHP framework.
